GENERAL REVIEW.

ASA DOW, Esq., President:

Sir,—In reviewing briefly the business of Chicago for the past year it is exceedingly gratifying to note that it presents scarcely any features that call for explanation as to why they have existed, as is always felt to be more or less a necessity in times of commercial and financial depression, producing results which are regarded as in some sense a proper subject of apology. The year opened with a renewed confidence on the part of the business interests of the country that brighter days were dawning upon us, and that confidence, which is largely the basis of all success in business affairs, has steadily grown as the months have passed until at the close of the year we find nearly all the industries of the country in active and profitable operation, while a feeling of buoyancy is manifested in all directions. The agricultural interests have fully shared, if indeed they have not led, in the general condition of prosperity; the farmers' crops have, as a rule, been of at least fair average, and in many sections exceptionally abundant; these, with the increased demand for them, created by the revival of business in the consuming sections of our own country, supplemented by the extraordinary calls upon us by less favored nations, have formed the basis of a commercial activity in all lines that is a subject of most hearty congratulation. Chicago, being preëminently the leading primary market for agricultural products, has been in a position to absorb its full share of the benefits resulting from this improvement in commercial affairs, and has been enabled to transact, especially during the latter portion of the year, a volume of business that has taxed the facilities of her merchants to their fullest capacity.

The receipts of agricultural products in their various forms have increased over those of 1878, and largely over those of any previous year. In grain, including its equivalent represented in flour, the receipts have amounted to the aggregate of 138,154,571 bushels; those of seeds have increased nearly thirty per cent over 1878, and in live stock there has also been an increase over the unprecedented receipts of the previous year. The returns for these products have enabled the farmer, as well as all others in the interior, to purchase largely of our merchants and manufacturers, giving a life and activity to general trade quite exceptional in late years. The amount of lumber and other products of the forest sold and shipped to the interior has increased to a considerable extent, while the prices realized for these have averaged higher than in 1878. In general merchandise the increase of sales by the wholesale merchants of the city has not been less than thirty to thirty-five per cent in the value of goods sold: in some lines, especially iron and other metals the increase has been much larger, while in very few has it been less than twenty to twenty-five per cent over sales of 1878. Sales of the product of local manufacturers have also increased in a very considerable percentage, many establishments having been crowded with orders to their full capacity.

The proposed resumption of specie payments by the government at the beginning of 1879 had the effect, for many months previous to the time named, of unsettling business

enterprises to a marked degree. The uncertainty as to the result of that proposition, and the doubts expressed by many able financiers as to its practicability, inclined cautious men to refrain from new ventures until the experiment should have been tested, and the result ascertained. The experience of England in the early part of the present century in efforts to reach a similar result was urged, in exaggerated terms, as a warning against such an attempt on our part, and the direct calamities were predicted as the outcome of the prop-History, however, does not always repeat itself, and the ease with which the measure was accomplished speedily silenced all opposition to the law directing the fulfillment of the long-neglected promise of the government to pay its honest debts, while gold has flowed out among the people more freely than it has ever done since the government had an existence. Resumption being an accomplished fact, but little prospect remained of any profitable result being reached by hoarding one's money in the hope of realizing profit by a feared, if not hoped for, calamity to the financial affairs of the country, and hence capital began to creep out from its hiding-places seeking investment in more profitable employment. It may well be feared that the rather wild race for investment within the past few months has been too precipitate for the final welfare of our financial affairs, and perhaps somewhat of a check to the speculative movement,—especially in respect to some of the stocks of corporations, which a short time since were regarded as possessing but little of intrinsic value,—may at this time be the dictate of sound financial discretion.

Our exports of domestic products have continued to increase, largely by reason of the partial failure of the crops in Great Britain and continental Europe, and the balance of exchanges being in favor of this country, has enabled us not only to retain our own production of the precious metals, but has called hither large supplies from other countries. The advantages of a large stock of coin, not only in the banks of the country and in the National Treasury, but also in the hands of the people, can scarcely be overestimated in its influence in maintaining a sound financial basis for our domestic transactions. It were well for us, now that we can do so, to make the effort to adopt actual coin as money to a larger extent than ever before, and gradually substitute it for a portion of the promises to pay which this country has always tolerated as money, and which have so often proved but a delusion and a snare to all financial calculations. It is to be regretted that with the large addition to our circulating medium, resulting from the diffusion of coin, there is a manifest disposition to increase the paper issues, the result of which, if carried to any considerable extent, is almost certain to be an undue inflation of values, to be followed by the inevitable reaction, and perhaps a prostration of the energies and industries of the country, such as we have witnessed in the past few years.

That the United States has recently assumed a new position in respect to its influence on the industrial affairs of Europe will scarcely admit of doubt. The facilities of this country for producing food at a lower price to the European consumer than it can be produced at his own door, has attracted the attention not only of the merchant and the agriculturalist of England, but has also been deemed a proper subject for investigation by Parliament. No question can more readily induce inquiry on the part of the governing class in Great Britain, than one touching the rental value of the lands largely owned by the aristocracy of that country, and from which the means to support an idle and non-producing existence is derived. Within the past few years, largely on account of the improved and less expensive means of transportation in the United States, the cheap and productive lands of this country have been brought into a sharp competition with the farms of Great Britain, and it seems to be fully demonstrated that our breadstuffs and provisions can be sold, with a fair margin of profit to the western producer, to the people of Great Britain at prices that their own farmers cannot afford while paying the rentals hitherto demanded by the land proprietors. To reduce the rentals promises bankruptcy

to many of those whose estates are encumbered; to retain the present rates promises a general exodus of the tillers of the soil, so that to-day the aristocracy of Great Britain seem to be confronted with an issue of the greatest importance, the determination of which may be followed by results far-reaching in their influence, but which in any event can scarcely be disadvantageous to the people of the United States. The influence of American competition in producing a food supply has also extended to continental Europe, our grains and provisions constantly finding new markets, and meeting with much favor wherever introduced. It is a notable fact that the exports of wheat from Atlantic ports in 1879 were nearly as much to continental Europe as to Great Britain. Of corn, our exports to the Continent in 1878 were very nearly double those of the previous year, while Great Britain actually took less of it than in 1878. There has also been a marked increase within the past few years in the consumption of American meats by continental countries. The question of a protection to home producers by the enactment of import duties on foreign breadstuffs and provisions has been seriously agitated in Great Britain, and has actually been adopted by Germany. The effect of such legislation on the general industries of Germany will perhaps be less severely felt than in Great Britain, whose present position has been achieved by the adoption of a policy whereby raw material and food could be provided for her immense manufacturing population at the lowest possible cost; her wealth and commercial power having been largely attained through her ability, by this policy, to become the greatest manufacturing nation Any change of policy that contemplates the making of food dearer to her operatives, must seriously cripple her ability to compete with other nations in manufacturing, and it may be assumed that such a policy is not likely to be favored by her commer-The United States may therefore rest reasonably confident that those markets will remain open to the cheap supplies we shall be able to offer. It appears to be quite probable that the minimum of expense in transporting the products of the western states to Europe has hardly, as yet, been reached; inland transportation to the lakes still remains at nearly the figures of five years since, but it can doubtless be considerably reduced as the territory becomes more thickly settled and brought under cultivation, thereby increasing the volume of traffic for the railway lines. The completion of the improvements in the Canadian water routes will also tend to still further reduce the average cost of moving property hence to the ocean.

It is to be regretted that in the vast volume of ocean transportation furnished by the United States, our own people have so small a share. It must certainly be humiliating to American pride, to say nothing of the loss of wealth which the fact involves, that in 1879 the percentage of the foreign commerce of this country carried on in American vessels was but twenty-three per cent of the whole, while in 1856 it was over seventy-five per cent. The history of the world presents few if any instances where nations have attained any lasting preëminence which were dependent upon others for conducting their commercial intercourse with foreign countries. Since 1870 the foreign tonnage engaged in American commerce has much more than doubled, while our own has increased less than twenty-five per cent. Whether this be from lack of skill in the construction and management of ships, or on account of the greater expense of building and maintaining them under the American flag, or from any other cause, it certainly behooves us to seek and apply the proper remedy for a condition of relative commercial decadence so discreditable to our enterprise, while so profitable to our competitors.

In respect to the value of farm products shipped from this city during the past year, and which measurably represents the ability of the agricultural communities whose surplus products are marketed in this city to cancel obligations or to purchase other commodities, a careful estimate gives the following result:

Flour and Grain (equal to 125,528,379 bushels)	
Meats, Lard, Tallow and Dressed Hogs	
Butter and Cheese	
Wool and Hides	
Seeds and Broom Corn	
Highwines and Alcohol	
Miscellaneous Products	3,600,000
A Grand Total of	\$252,152,000
Corresponding Estimate for 1878	\$207,400,000
Corresponding Estimate for 1877	218,400,000
Corresponding Estimate for 1876	231,450,000
Corresponding Estimate for 1875.	215,300,000

The above estimate of the value of grain shipped would be much larger, had the stocks in store moved forward to an extent usual in the closing months of the year, the amount of grain in store in the city being about 3,000,000 bushels greater at the close of 1879 than at the corresponding time a year previous.

For details as to the sources of supply and the lines of shipment of the various commodities, reference is made to the several tables of receipt and shipment herewith.

FLOUR.

The receipts of flour have been about ten per cent larger than in 1878,—the city manufacture somewhat less. Nothing of special importance has occurred in the course of this trade during the year; the demand for flour in sacks continues to increase, export orders being largely for such. In all statements herewith these have, as heretofore, been reduced to their equivalent in barrels. Some modifications have been made in the rules for the inspection of flour by grade. These rules, as now in force, are published herewith.

WHEAT.

The receipts of wheat in 1879 have aggregated 34,106,109 bushels, and the shipments 31,006,789 bushels. The receipts are the largest, by over 4,000,000 bushels, that have ever arrived at Chicago in one year, the movement being exceptionally large during the autumn months, aggregating in October over 6,000,000 bushels. Our receipts continue to be mainly of the spring sown varieties, but the proportion of winter wheat received at this point has largely increased within the past two years; the outturn of the winter wheat crops of 1878 and 1879 in the western states was of unusually good quality, and the yield greatly in excess of the average of late years. In some portions of the states of Illinois and Indiana the product has reached the extraordinary return of forty-five to fifty bushels per acre. The spring wheat crop of the northwestern states was, to a large extent, a disappointment of the expectations had in regard to it previous to its being harvested, the average product per acre being less than one-half that of the winter wheat in the adjoining states. Prices have averaged somewhat higher than in 1878, but have taken a wide range. No. 2 Spring opening in January at about 82 cents, gradually advanced to 107 in June, declined to 84 in August under the prospect of an abundant harvest, but later, mainly under the influence of a present and prospective demand from Europe, advanced to 1331/2 in the closing days of the year. Speculative operations in wheat for future delivery have been unusually active, and the volume of such transactions has been greatly in excess of any former year. These operations, confined almost exclusively to No. 2 Spring Wheat, have kept our current prices for that grade, for almost the whole year, considerably above a shipping point, resulting in holding in store in this city an average amount of wheat very much larger than is usual, the weekly report of stocks from January 1 to May 15, and from November 1 to the close of the year, never

falling below 5,000,000, and for a considerable portion of the above time being in excess

of 7,000,000 bushels.

The crop of the United States harvested in 1879 is estimated by the National Department of Agriculture at 448,755,118 bushels, valued at the farm at \$499,008,803, the average yield of the whole country being placed at $13\frac{7}{10}$ bushels per acre, the largest yield, with one exception (1877), in the past ten years. The exports of the country for the year ending June 30, 1879, were 122,353,936 bushels in grain and 5,629,714 barrels wheat flour, the whole being equal to 147,687,649 bushels of wheat, which is over sixty per cent in excess of any corresponding year. The success of the winter wheat crop in the western states in the past two years, and the unfortunate damages which have been sustained by the spring wheat crops, are operating to induce a much larger relative production of the former. The December report of the Department of Agriculture says: "Our preliminary investigation points to an increase of twelve per cent in the area sown in winter wheat," and adds that all the states, except Alabama, Mississippi and Arkansas, "show an increase, especially the spring wheat states of the northwest." This report represents the crop as starting out "on the whole under prospects considerably above average, especially in the large winter wheat states."

CORN

Large as were the receipts of corn in 1878, they have been exceeded by those of the past year, aggregating 64,339,321 bushels. Prices ruled very steady during the first nine and a half months; about the middle of October, in sympathy with the markets in England, a liberal advance was established, touching at one time 49 cents per bushel; closing, however, at about 40 cents December 31. The crop raised in 1878 was the largest ever produced in the country, amounting to 1,388,218,750 bushels; that of 1879, while subject to possible modifications by later returns, is placed by the Agricultural Department at about 1,538,000,000. As the excess of this crop over its predecessor is much more than the largest amount ever exported in one year, the question as to where it can find a market is one of no little consequence. The product of Illinois for 1879 is placed by the State Agricultural Department at 305,913,377 bushels, against 251,149,230 bushels as the product of 1878, according to the same authority. The yield in 1879, especially in the counties north of the center of the state, was exceptionally heavy, and as a rule the quality is good. Early frosts produced injury in some localities, but on the whole the result of the crop in this state as to its outturn is quite satisfactory, and if prices can be maintained at their present range, the farmers of the state will have abundant reason to congratulate themselves on a remarkably successful year's industry.

OATS.

The crop of Oats in 1879 was inferior in yield and less in acreage than that of 1878, the aggregate for 1879 being placed at 364,253,180 bushels, against 413,758,560 the previous year, the yield per acre being 28% and $31\frac{4}{10}$ bushels respectively. The crop in Illinois was quite inferior to that of 1878, being about 54,600,000 bushels, against over 62,000,000 in 1878, on over 60,000 less acres, as reported by the state authorities. No. 2 Oats in store in the Chicago market have ranged from $19\frac{1}{2}$ cents per bushel at the beginning of the year to 36% cents early in December, closing at about 36 cents per bushel.

RYE.

The receipts of Rye for the year have been substantially the same as in 1878, aggregating 2,497,340 bushels. The market has shown a quite steady advance, with trifling fluctuations, from 43 cents in January to 81 in December for No. 2 in store. Over 5,000,000 bushels, including Canadian, were exported during the year to Europe.

BARLEY.

The trade in Barley has been rather moderate during the past year. Speculations in it have been confined within much narrower limits than during most of the late years. The crop of 1879 marketed in Chicago has been of fair average quality, prices for it opening in September at 75 cents per bushel for No. 2, and advancing to 92 cents in December, closing a trifle lower. The receipts have been 4,936,562 bushels, against 5,754,059 in 1878. The total crop of the country for 1879 is less both in acreage and product than the previous year. A considerable quantity of California Barley has been sold in this market, at prices but little above the better qualities of the western-grown grain. Some has also been received from Canada, principally by rail, duties being paid at Port Huron.

LIVE STOCK.

Geo. T. Williams, Esq., Secretary of the Union Stock Yards and Transit Company, reports the receipts of Live Stock at those yards, and its valuation for the past five years, to have been as follows:

Years.	Cattle, Number.	Hogs. Number.	Sheep. Number.	Horses. Number.	Total Value.
1879	1,215,732	6,448,330	325,119	10,473	\$114,795,834
1878	1,083.068	6,339,654	310,420	9,415	106,101,879
1877	1,033,151	4,025,970	310,240	7,874	99,024,100
1876	1,096,745	4,190,006	364,095	8,159	111,185,650
1876	920.843	3,912,110	418,948	11,346	117,533,942

Prices for Cattle have been upon a rather lower range than in 1878, and for very considerable portions of the year the market has ruled extremely dull. Choice beeves have averaged something less than \$5 per 100 lbs; extra to fancy ranging from 25 to 50 cents per 100 lbs higher. Nearly 500,000 head have been slaughtered by the city butchers and packers. A very large percentage of these have been either packed in cans or forwarded east and to Europe in the carcass. Of the shipments, a considerable number both of Cattle and Sheep have been taken for export, but as these are usually billed only to the seaboard, they do not appear in the report of direct exports herewith.

The sources of supply of Cattle for the Chicago market are constantly widening, and it is expected that as the railway lines are extended westward, especially into Montana, an immense business in stock raising will be developed in new territory remarkably well adapted to this form of agricultural industry.

In Hogs the receipts have been in excess of those of 1878, which were much the largest of any previous year. Prices have ruled somewhat lower, as a whole, than in 1878, but close at nearly the highest point of the year. It is generally conceded that the stock of Hogs in the country at this date is less than a year since. The Agricultural Department at Washington estimate it to be over 1,000,000 less than at the close of 1878, this result being reached, in large measure, by the ravages of disease. Every species of disease to which swine are liable seems to be denominated "hog cholera," although disease appears in many forms, and undoubtedly needs many different treatments. No specific for disease in Hogs, whether of one or many types, appears to have been as yet discovered, and the country suffers annually the loss of many millions of dollars by its fell ravages. Nearly three-quarters of the Hogs received within the past year have been slaughtered by city packers; the remainder mainly of the heavier grades, have been mostly shipped to eastern markets.

THE PACKING AND PROVISION TRADE.

The packing of Cattle is now mainly confined to that marketed in tin cans. This business has grown to vast proportions, but it is to be regretted that accurate statistics in respect to it are not attainable. The reported shipments of this class of product reach over 650,000 cases, but it is doubtless true that a considerable amount is classed under the head of miscellaneous merchandise, especially as 442,980 cases are reported among the direct exports from the city to Europe.

In the packing of Pork, Chicago still retains its preëminence, the packing of the calendar year of 1879 having reached over 4,800,000 head. The trade in meats in its various forms of packing, and in lard, has been unusually active during the year, speculative trading having far surpassed in volume that of any previous year. The lowest prices of the year were at its beginning, mess pork opening in January at \$7.30@7.50 per barrel; short ribbed sides at \$3.40@3.45 per 100 lbs, and lard at \$5.40@5.45 per 100 lbs. highest prices attained were near the close of the year, when mess pork reached \$12.75 per barrel, and lard \$7.55 per 100 lbs. In April mess pork touched \$10.40, and lard sold as high as \$6.87½ in March. From these points the market pretty steadily declined to \$8 for pork and \$5.50 for lard late in August, from which there was a steady hardening of prices to near the close of the year. The direct exports to Europe have been larger in meats and a trifle less in lard. The exports of the country for the calendar year have been substantially the same as in 1878 on pork and lard, but over 100,000,000 lbs greater on boxed meats. At the close of the year the city packing has been brought to nearly a standsfill on account of a disagreement between the packers and their employes, the latter demanding conditions as to the terms of their service which were felt to be of a character not to be tolerated.

OTHER FARM PRODUCTS.

The trade in seeds has very greatly increased, especially that in flax seed, the receipts of which have aggregated over 2,000,000 bushels. In other seeds the receipts have been about 2,000,000 pounds over those of 1878. All seeds have averaged higher in price than in the previous year, especially timothy, which has appreciated with but little reaction from \$1.05@1.10, at the beginning of the year, to \$2.40@2.60 at the close. The crop of 1879 proved to be materially less than that of the previous year, and the quality of that marketed in this city was also somewhat inferior. Clover, which ruled remarkably steady in 1878, has fluctuated more widely within the past year, the extreme range being from about \$3.65 to 6.30 per bushel for choice. At the close of the year choice seed was worth \$5.50@5.60. The market has been stimulated by an active demand for export. Nearly 125,000 bushels have been exported direct to Europe from this city. The receipts of flax seed were small, until the crop of 1879 began to move in August, with steadily advancing prices, from \$1.25 per bushel in January, to \$1.45 in June and July, for prime The new crop started at about \$1.25 and reached \$1.55 in November, closing at \$1.48@1.50 per bushel. The quantity of seed moving induced shippers in the fall months to try the experiment of forwarding it eastward by lake in bulk, and several cargoes were shipped in that manner with very satisfactory results. The manner of determining the value of flax seed, more or less mixed with refuse matter, has been found to be very unsatisfactory to sellers, and it has been suggested that some system of inspection should be inaugurated that would prove a just umpire in respect to this question. The trade has grown to proportions that would seem to justify the employment of every facility necessary for its satisfactory transaction to all concerned.

The volume of dairy products has also increased, the reported receipts of butter being 54,623,222 pounds, and of cheese 32,590,519 pounds. Considerably more, especially of butter, has been received by express, of which no correct record is kept. The trade in butter has

been remarkably steady, although prices have taken a rather wide range. decline occurred from January to July, choice dairy selling at that time as low as 12 cents per pound. From that point it gradually advanced to 30 cents, about the 1st of November, and closed at 24@25 cents. Creamery has been in good demand, with a range for choice of 3@7 cents above the current prices for fine dairy. Cheese ruled very quiet during the early months, but since about the middle of September it has been in active demand at strong and advancing prices, prime selling readily at 13 cents per pound, against $8@8\frac{1}{2}$ cents at the beginning of the year and $5\frac{1}{2}$ cents in July and August. The exports from this city of butter and cheese have been less in 1879 than in 1878. exports of the country for the year ending June 30, 1879, were 38,248,016 pounds of butter and 141,654,474 pounds of cheese, the whole valued at \$18,001,173, against 21,837,117 pounds of butter and 123,783,736 pounds of cheese, valued at \$18,035,414, for the year ending June 30, 1878: a very respectable increase in quantity but a large reduction in price. In dairy products, as in most other articles of farm production, Great Britain continues to be our best customer.

In other products there has been no very essential change from the ordinary course of trade. In wool and hides the volume of business has been larger, and for the last three or four months very active, at materially advanced prices.

LUMBER.

The aggregate receipts of lumber have been largely in excess of any previous year, aggregating 1,469,878,991 feet. The trade, especially during the fall months, has been very active and highly satisfactory to manufacturers and dealers. The average advance on cargo lumber for the year has been about $8\frac{1}{2}$ per cent as compared with 1878, but during the last few months it has been fully 40 per cent as compared with the corresponding months a year since.

DIRECT EXPORT TRADE TO EUROPE.

The shipments of produce from Chicago to Europe on through bills of lading have increased over 27 per cent as compared with 1878, reaching the large amount of 768,153 tons, consisting mainly of grain, flour, meal and provisions; the value of these commodities could not have been less than \$45,000,000. This class of business has grown so quietly and so steadily that its magnitude is but little appreciated by even our own citizens, but when attention is called to the fact that it is sufficient to load a steamer of 2,500 tons capacity every business day in the year, its importance will be the more readily comprehended.

TRANSPORTATION.

This subject ranks among the most important as affecting the prosperity of every industry in our country, and is of especial interest to those engaged either as agriculturalists or as dealers in the products of the soil at points remote from those at which such products are needed for actual consumption. The subject has become a prolific theme for discussion, and has brought to public attention numberless propositions, intended by their authors for the benefit of producers and consumers, by reducing the cost of moving the necessaries of life from one of these classes to the other.

In past generations, when the common carrier was accustomed to ply his vocation on the highways and waterways of the country, which were open alike to all, and whereon even a novice could, by a moderate outlay for equipment, engage the more experienced in a competition that would act as an effective check on any disposition to conduct the business on any other basis than one of fairness and equity, there was small opportunity for the imposition of extortionate charges for services performed or for unjust discriminations as between individuals or communities. The advent of the era of railroads, owned

and operated by corporations brought into existence by legislation of the several states and originally designed to be operated only within the state which had created them, has wrought a revolution in the system of transportation which is constantly presenting new developments and bringing into notice new questions touching the relations of the people to these corporations, for the true and just solution of which the best thought and the wisest measures attainable should be brought into requisition. A railroad corporation, at least in so far as the major portion of its line is concerned, is essentially a monopoly, holding the power, in many instances, assumed to be conferred on it by special legislation, of building up or destroying the value of the property of individuals or of communities It is probably quite true that instances are not frequent, if they have ever occurred, where such corporations have wantonly designed to injure the property or business of any particular individual or locality, but it cannot be denied that the policy frequently pursued has had that effect. Cases have recently been developed, in a general investigation into the management of the railroads of New York,—and they doubtless exist elsewhere, - in which discriminations in favor of or against certain localities, and in some instances in favor of individuals, have resulted in the destruction of established and legitimate business and the impoverishment of men and communities. Certainly no such power was ever intended to be conferred on any corporation created for the benefit of the whole people and by their own representatives. The unparalleled development of the resources of the country, resulting from the construction and operation of railroads, naturally inclines a reasonable public to admit that the influence of these corporations for good has been of so preponderating a character that incidental evils should be treated with great leniency by a people who have shared their benefits in much greater measure than the proprietors of the lines themselves. It may be assumed that the great interest the people themselves have in the maintainance of the lines upon which they are dependent for their own prosperity will not permit them, if their right to do so be conceded. to make unreasonable demands upon these corporations, or seek to impair the value of their property. It is, however, their right to demand, and doubtless within their power to enforce, just treatment in return for the valuable privileges they have conferred. The railroad question has within the past year assumed such new features that it is to-day, perhaps, the most important one presented for the consideration of the people of the It has been held by many that time would remedy any real evils that exist in the system, that with the growth and development of the country new lines would be constructed that would, by the laws of competition, regulate and control all matters involved in the question upon principles of equity and justice, or at least that such competition would be the paramount influence to control, in the interest of the people, the management and rates at points affected by it. The past few years, however, instead of developing new competitive forces, have been pregnant with schemes of consolidation, and to a very alarming extent the feeble competition which from time to time has at various points shown some vitality, has succumbed to absorption and entirely ceased to exist. A comparatively few individuals are steadily gaining control of the valuable inter-state lines, through which they can dictate the policy of, or effectually destroy those of less importance. By far the most formidable scheme for destroying competition that has ever been devised in this country or the world, has been developed during the past year. By it all the great trunk lines between the east and the west are practically consolidated, in so far as their relations to the people are concerned, into a giant monopoly, from which the element of competition seems to be entirely eliminated. At intervals, for years, these lines, as the result of real or supposed infractions of agreements among themselves as to the conduct of business, had been accustomed to seek redress by a warfare as bitter and intense as that in which nations, for similar reasons,

have been wont to engage their armies. The implements ordinarily adopted for the conduct of these battles were abatements in rates, more or less common to all, but not infrequently accorded to large shippers in greater measure than to the general public: this constituted a most odious discrimination, that in its results tended strongly to build up and strengthen the already strong at the expense of the weak. These special rates to large shippers were liable to be so made as to cover property not their own, and on which they could realize a profit of at least a portion of the difference between the special rate and that charged the general public. In respect to this method of conducting business, a prominent officer of one of the trunk lines is reported to have said before the New York committee of investigation that his "company never inquired whether the grain carried on such contracts belonged to the parties making the contracts, and had no means of knowing whether the parties farmed out part of their contracts to other people." He did not think "it made any difference to the railroad whether the grain for a contract with one man for a thousand car-loads came from one person or fifty." The latter part of this statement may be true as regards the railroad, but it will hardly be doubted that it does make a material difference to the forty-nine whether or not they are placed on an equality with the favored one. The damages inflicted by these conflicts were expected to starve the enemy into a condition that would compel an adjustment of the disagreements. During their progress competition held unrestrained control, a competition, however, that had in it no healthful ingredients, and which in its ultimate results was injurious in almost equal measure to the railroads and to the majority of their ordinary patrons. These railroad wars tended to unsettle all business calculations, as they suddenly, and usually without notice, materially affected the value of all property in which the element of transportation cost was an important factor. Those who were benefited by a temporary cut rate were far outnumbered by those who were made to suffer the results of the warfare, as the adoption of a truce was usually accompanied with an advance in rates sufficient to make good the wastage of the conflict. This bore with special severity on those who in the succeeding months, being obliged to patronize the lines, were made to contribute to this end.

These conflicts were of such frequent recurrence, and were so demoralizing to all the interests involved, that the management of the several lines evidently came to appreciate the absolute necessity for the adoption of some measure that should effectually put an Various plans were suggested, some of which failed with brief attempts at enforcement, until finally the present organization was effected, which became fully established as to both west and east bound traffic in June last. In December the organization embraced thirty-four railroad lines, substantially covering the whole of the east and west traffic of the United States north of the Ohio river, and through Canada. its general objects, the following, from a late address of its chief officer to the representatives of the lines interested, may be considered a fair outline: "You have now for the first time established a practical method by which the competitive traffic of your roads can be properly managed and controlled. Heretofore this was impossible, the mere holding of conventions of railroad managers, passing resolutions and then dispersing and letting things take care of themselves, each party acting as it sees fit, will not accomplish the purpose of intelligent joint management of the large property under your charge. You have now added to the legislative department—your conventions—also a permanent executive department, the duty of which is to see that the resolutions passed and agreements made are faithfully carried out. In addition to this you have established a judiciary department, consisting of a Board of Arbitration, whose duty it is to settle peaceably any question of difference without resort to wasteful warfare, with all its injurious conse-* The companies composing this association have already, by their voluntary action, abolished the pernicious system of special contracts, and all shippers are now put upon an equal footing. Rates for the last few months have been everywhere (in the territory in which these roads are located) maintained, and the great disparity between the local rates and the competitive through rates, which has heretofore been so great a source of trouble and complaint, has ceased to exist."

That the past experience of the railroad management has demonstrated the necessity of some such method of cooperation as is indicated in the above extract will not be questioned, and from a standpoint embracing only the view of the railroad interests, those interests may be congratulated that a scheme so promising in its results has been inaugurated, with every indication of permanence and of utility to them. The public will also have reason to rejoice if it shall prove that the uncertainties attending business operations, as the effect of railroad wars, are at an end, and provided this gigantic combination shall not develop into a means of oppression and extortion. That it has the power to exercise a practically despotic tyranny over the people in respect to the charges demanded for transportation services cannot be denied. That it will refrain from unjust and unreasonable exactions depends to a great extent on the sense of justice displayed by its management. For a portion of the year the navigable water-ways will undoubtedly hold in check any disposition that might otherwise prevail for the undue advance of rates, but for nearly half the year these can exercise little but a prospective influence, and for the vast volume of property that must be moved in the winter months rates can be maintained at a point wholly unjustified by the cost of the service. It must be confessed that the large advance in rates to the seaboard enforced in the last months of the year does not give encouragement to the hope that rates are to be regulated on the basis of what the service is really worth, but rather upon one which assumes the right to demand all it can get. It certainly will not be claimed that if 15 and 20 cents per hundred pounds on grain from Chicago to New York, which were the rates established by the combination in June and July, were then remunerative, 40 cents for the same service is a necessary charge in Assuming the average distance by the several lines from Chi-November and December. cago to New York to be 960 miles, 40 cents per 100 lbs is equivalent to 8½ mills per ton per mile. The last annual reports of several of the lines engaged in this service gives the cost per ton per mile of moving freight on their lines as follows: Pittsburgh, Fort Wayne & Chicago, $4\frac{65}{100}$ mills; Lake Shore & Michigan Southern, $4\frac{74}{100}$ mills; Pennsylvania Central, $4_{\overline{100}}^{83}$ mills; New York Central, $5_{\overline{100}}^{92}$ mills. These figures cover the cost of moving all freight, local and through, as well as the various classes, grain being below fourth class. All railroad experts admit that the cost of moving freight for long distances is much less per ton per mile than for shorter distances. Applying these principles to the ruling railway rates at the close of 1879, they appear to be wholly without justification, and well calculated to impair confidence that the new order of things can be relied on to promote justice and fair dealing between the railroads and their patrons. While it is admitted that the present arrangement seems admirably calculated to benefit the roads themselves, there seems to be an absolute necessity for the intervention of some power to protect the This, so far as it shall relate to the traffic passing beyond the bounds of a single state, can only emanate from the national government, which undoubtedly possesses some degree of authority in the matter. To what extent this may be lawfully exercised remains yet to be determined by the decision of the proper tribunal.

A bill is now pending in congress designed by its author to correct some of the abuses which have grown up in the conduct of inter-state transportation by rail, and in some measure control the railroad management of lines engaged in that service. The subject is of such vast importance, and its ramifications and bearings are so intricate, that great caution should be exercised in inaugurating legislation respecting it, especially such as contemplates a supervision of details by the iron-bound provisions of statute law. In many of its features this bill seems to have been well considered, and some of them are essential

to any attempt at governmental control. It, however, seems to ignore the just advantages possessed by localities favored by nature with competitive forces which in an unrestricted and untrammeled condition of railway competition have always exercised a All that the people have demanded in respect to railcontrolling influence over it. way charges, and all they are entitled to demand, is that their business shall be done at a charge that under the circumstances is equitable and fairly remunerative to the railway company. They have just cause for complaint if they are taxed to make good losses sustained by a railroad company in doing business for others at less than cost, but it is no good ground for dissatisfaction that a railroad, in order to secure business from points more remote from a common destination, will accept even less for the greater service than is charged for the less, provided, always, that the higher rates are on an equitable basis and the other business is not done at its expense. Upon this principle, the fourth section of the bill referred to seems objectionable, in that it provides "that it shall be unlawful for any person or persons engaged in the transportation of property, as provided in the first section of this act, to charge or receive any greater compensation per car load of similar property for carrying, receiving, storing, forwarding or handling the same for a shorter than for a longer distance in one continuous carriage." It will be observed that no consideration is to be given to volume of business, return traffic, nor the influence of competition by other routes or other systems of transportation. Under the operations of such a law it is a question whether cities having the advantages of a cheap water transportation, like Chicago and many others, would realize much advantage from railroads in a competition to a common point, because the railroad lines, rather than reduce their local rates to or below the rates they could command for the competitive business in conformity to the law, would perhaps prefer to abandon the latter, even though it might be slightly remunerative. It is more than doubtful if any good result can be accomplished by a statute regulation of this character, and it is to be hoped that the initial measures in a system of governmental supervision of this important question may not be encumbered with provisions of a character in any degree inharmonious with the principles upon which the fair conduct of such a business should rest. Other provisions of the bill are of questionable expediency, especially that relating to the so-called pooling of competitive busi-The country at large has no doubt suffered much more injury from the effects of reckless and spasmodic contests for competitive business than from any agreed division of such business at equitable rates. That provision of the bill which restricts its operations to car-loads of property is exceedingly obnoxious, as it practically invites evasions of its spirit, and would inevitably destroy the good it might accomplish if of general application.

If congress will simply establish a commission, say of five competent men, who shall be recognized by the country as men of unimpeachable character, and of eminent qualifications for the delicate and responsible duties of their position, and clothe such a commission with ample authority to supervise and control by their approval or disapproval all questions relating to this subject that involve the rates to be charged for transportation, the classification of the traffic, and the general manner in which the business shall be conducted, conferring upon it the fullest authority to enforce its decisions, subject only to appeal to the United States courts, pending which those decisions shall be observed; giving it full power to require the production of books and papers, and to examine them and any individual when deemed necessary, and requiring said commission to make report to congress at each regular session as to the results of their operations, and what, if any, further legislation is necessary to enable it to more fully accomplish the object of controlling the inter-state transportation business so that it shall be conducted in all its details with honesty and fairness, it may safely refrain from further details at the present time.

In respect to the facilities for the movement of property to and from Chicago there has been no essential change during the past year. Arrangements are in progress, however, for the independent connection with this city, at an early day, of two additional lines, the Grand Trunk Railway, of Canada, and the Wabash Railway, the former of which will doubtless have completed its connection with the city by or before the first of March, and the latter in the early spring or summer.

The business of transportation by lake has been much more remunerative than for several years past, and this business is to be congratulated that it has fully shared the

improvement in the general affairs of the country.

Apologizing for the unusual length to which this review has extended, but feeling that it was not improper, in a report of this character, to discuss questions of the first importance to the commercial interests of our city,

I am, MR. PRESIDENT,

Your obedient servant,

CHAS. RANDOLPH,

Secretary.

CHICAGO, January, 1880.

REPORT OF THE BOARD OF DIRECTORS.

To the Members of the Board of Trade, Chicago:

GENTLEMEN,—Your Board of Directors respectfully submit their usual annual report of the financial affairs of the Association at the present time, together with a statement of the receipts and expenditures of the past year, and such remarks as seem appropriate touching the interests of the Board of Trade, and the business affairs of our city and country.

At the last annual meeting the assets of the Board, exclusive of furniture and fixtures in current use, were stated to be:

One thousand and fifty shares Chamber of Commerce stock, net cost	\$83,471	44
Chicago city 7 per cent bonds, par value	10,000	00
Hyde Park 7 per cent bonds, par value	30,000	00
United States 4 per cent registered bonds, par value	40,000	00
Chicago & Alton Railroad stock, par value	10,000	00
Cash in hands of the Secretary and Treasurer	440	77
Total	\$172 Q19	91

During the past year the investments as above noted have been changed to the extent of selling the Chicago & Alton Railroad stock \$10,000, and the purchase of Cook county five per cent bonds of the par value of \$10,000, of which there has been sold, at a later date, all but \$5,000; thus reducing the net face value of the securities now on hand, as compared with a year since, by \$5,000. All these securities have paid their regular dividends of interest, that of the Chamber of Commerce stock, owing to excessive taxation, being somewhat reduced, but still paying substantially six per cent per annum on the nominal investment in it by the Board.

The receipts and disbursements of the past year have been as follows:

RECEIPTS.

From visitors' tickets	From annual assessments 1,797 members at \$20		\$35,940	00

At the beginning of the past fiscal year the membership decided to cancel the authority heretofore conferred on the Board of Directors, of issuing clerks' tickets to the Exchange room. This change, while in the main satisfactory, although doubtless a serious inconvenience to some, has resulted in a loss of over \$8,600 in revenue to the Board, as compared with the previous year. The investments of the Board by changes during 1878, and the reduced dividends before alluded to, have also produced a less return, and from some other sources the revenue has been somewhat diminished. It was feared these losses of revenue would make a serious draft upon the securities owned by the Board, to meet the current expenditures of the year, a necessity, but the Board of Directors congratulate the Association on being able to report that the aggregate of expenditures over the revenue of the year proves to be quite inconsiderable in amount, being but \$897.40, against a deficit of \$2,268.06 in 1878.

The Rules of the Board require the Board of Directors, previous to the annual meeting of the Association, to assess on each of the members an amount which in the aggregate will, in their judgment, be sufficient to meet the expenditures of the Association during the ensuing year, and that such assessment be reported to the annual meeting. The Board of Directors have fixed the annual assessment for 1880 at twenty (20) dollars on each member. This, with other sources of current revenue, may fall somewhat short of meeting the expenses of the coming year, but it is hoped the deficit, if any, may not prove to be serious.

The membership, at the close of the year, numbers seventeen hundred and ninety-seven, being but two less than a year since. During the year two hundred and sixty-seven memberships have been transferred, thus sensibly changing the personnel of the usual attendants on 'Change. Ten of the members who were associated with us a year since have been called away by death. Among the names thus stricken from our roll we recall some who had been long associated with us, and who have left behind a name that is a valued legacy to their families, while we, their business associates, gratefully cherish their memories, as we recall their record as honorable merchants, and remember their many good qualities as business and social associates.

The business transacted on the floor of our Exchange during the past year has exceeded in volume that of any previous year in our history. The products of our great agricultural districts have sought our market in increased volume, and as, on the whole, the prices realized have been fairly remunerative to the producer, we may congratulate the northwest, with which our city is so closely identified, upon a year of exceptional prosperity. The cereal crops of the United States for the past two years have been unprecedented in volume, and of remarkably fine quality in most parts of the country, and, owing to the misfortunes of Great Britain and continental Europe in respect to the outturn of harvests

for these years, a demand hitherto unequaled has existed for our breadstuffs. The vast influx of actual money received from abroad in exchange for our products has tended largely to strengthen our financial position, and has rendered easy the maintenance of the specie basis of our monetary affairs which was inaugurated so successfully a year since. Industrial enterprises which had languished for years have been reinvigorated, and with a restored confidence that a large measure of prosperity in the near future is reasonably certain to be realized, business in every department has assumed most encouraging features, and promises great activity and profitable results.

During the past year your Board of Directors have endeavored to effect some needed improvements in the manner of handling grain received by railroad, especially in respect to the large portion of these receipts that are sold to be transferred to east-bound railroads. The manner of determining the contents of cars so transferred has been exceedingly unsatisfactory to both seller and buyer, and it is to be regretted that the railway managers have not seemed to appreciate this difficulty to an extent that has secured their hearty co-operation in efforts to reform the evils complained of. The Board are not without hope that continued efforts in the direction of securing a more satisfactory arrangement than now exists for the proper care of this species of property may not be unavailing.

At the present time we find the business of the city confronted with a prospect of an early blockade in the movement of grain by the absorption of all the ordinary storage facilities, resulting from the unusually large stocks now in the elevators. The necessities of the case are such that action for relief seems to be imperatively demanded, and with this view the Board of Directors have sought a conference with the railway managers and elevator proprietors most in interest, for the purpose of devising some suitable measures for such relief as will enable the ordinary course of business to be carried forward for the coming months, until the grain now in store shall be moved in the channels to final consumption. It is believed this can be accomplished without serious embarrassment to our trade, and that within a few days the grain movement may be again resumed without restriction from this cause.

The largely increased volume of business transacted on the floor of the Exchange within the past few years renders the accommodations, deemed ample a few years since, quite inadequate to the present and prospective needs of the Board. The best and most feasible manner of securing the needed additional accommodations has been a source of earnest thought on the part of your Directors, and doubtless of many members of the Board. The arrangement made in 1864 with the Chamber of Commerce, and substantially renewed in 1871, whereby the Board has bound itself for a long series of years to the agreed rental of the premises we now occupy is in some sense a hindrance to as free an action as would be desirable. That lease could doubtless be canceled upon some equitable terms, but its abandonment would necessarily be attended with great pecuniary loss to the Board, your directors not for a moment entertaining the thought that the membership of the Board would desire a release from their obligations to the Chamber of Commerce upon any other than terms of honorable and fair dealing. The Board have considered the question in all its bearings very carefully, but have not as yet been able to arrive at any conclusions that they feel like basing a specific recommendation upon, but commend the subject to the careful consideration of the incoming Board of Directors.

In conclusion, your Board of Directors beg to extend to the members their congratulations that the clouds of depression and uncertainty which had so long hung over the business interests of the country seem to have been so far cleared away that the future of those interests at the beginning of the new year are full of promise and encouragement.

Respectfully submitted on behalf of the Board of Directors.

ASA DOW, President.

In the last twelve amounts the cash in the Treasury is deducted from the aggregate debt, and bonds issued in aid of the Pacific Railroads are not included; these amounted, on the first day of January, 1880, to \$94,815,488.39, including interest paid by the United States.

DETAILED STATEMENT

Of the Public Debt of the United States on the 31st of December, 1879.

	
DEBT BEARING INTEREST.	Amount Outstanding.
Six per cent. Bonds, known as Bonds of 1881	•
Six per cent. Bonds, known as Bonds of 1881	
Four and a half per cent. (Funded Loan) payable after September 1, 1891 250,000,000 00	
Four per cent. (Funded Loan) payable after July 1, 1907. 738,490,550 00	
Four per cent. Refunding Certificates 2.355,400 00 Navy Pensiou Fund, interest at three per cent. 14,000.000 00	\$1,786,686,850 00
Navy Pension Fund, interest at three per cent14,000,000 00	\$1,100,000,000 00
Debt past due upon which interest has ceased since maturity	14,691,925 26
DEBT BEARING NO INTEREST.	
Old Demand Notes issued in 1861-2	
Legal Tender Notes 346,681,016 00	
Fractional Currency 15,674,303 78	
Certificates of Deposit payable in Currency 10,245,000 00	•
Certificates payable in Gold 12.337.100 00	
Certificates payable in Silver 8,712,910 00	
Interest due, and accrued but not due 24,691.953 75	\$418,403,633 53
Total Debt	\$2,219,782,408 79
Cash in the Treasury	207,983,903 92
Total Debt, less Cash in the Treasury	\$2,011,798,504 87
Corresponding Statement of December 31, 1878.	2,028,648,111 09
Reduction of Debt in 1879	\$16,849,606 22
Reduction of Debt in 1878	17.307,331 70
Reduction of Debt in 1877	46,965,799 02
Reduction of Debt in 1876	26,910,953 46
Reduction of Debt in 1875	22,766,106 75
Reduction of Debt in 1874	16,717,024 15
Reduction of Debt in 1873	2,937,011 95
Reduction of Debt in 1872	81,586.073 02
Reduction of Debt in 1871	88,229,382 61
Total Reduction of Debt in nine years	\$322,269,238 88
Bonds issued in aid of Railroads not included in the above State-	
ment. For these Bonds the Government holds a lien upon the	
various lines.	
Issued to Union Pacific Railroad \$27,236.512 00	
Issued to Central Pacific Railroad 25 885 120 00	
Issued to Kansas Pacific Railroad 6,303,000 00	
Issued to Western Pacific Railroad 1,970,560 00	
Issued to Sioux City and Pacific Railroad	
Issued to Central Branch Union Pacific Railroad 1,600,000 00	\$64,623,512 00
Balance of Interest paid by the United States	
Interest accrued but not yet paid	\$32,130,681 75
Total Principal and Interest.	\$96,754,193 75
Total Principal and Interest. Corresponding Statement December 31, 1878	95,826,154 51
Increase of Interest Balance during 1879	928,039 24

Exhibiting the principal Nationality of Vessels entered at the Seaports of the United States, and showing the relative decline in American tonnage engaged in the foreign commerce of the country since 1860.

* Details of nationality of foreign vessels for 1879 not yet published.

Showing the tendency westward of the center of Wheat and Corn production in the United States, as developed by the United States Census Reports for 1860 and 1870, and the United States Agricultural Department Report for 1878. The Census Reports, while covering a single crop, are not in all cases confined to the crops of the same year, hence do not agree with the reports of the Agricultural Bureau. It is understood that the Census Reports for 1860 and 1870 embrace in the main the crops of 1859 and 1869, respectively, but doubtless in some localities the crops of 1860 and 1870 were reported on. The time embraced in taking the census, being in midsummer, covers the harvest season for Wheat, some canvassers taking reports before and others after the Wheat harvest. These discrepancies, however, do not seriously affect the value of statement below for the purposes for which it is here introduced.

Note.—The Secretary of the State Department of Agriculture estimates the value of the above crops at the farm to be as follows: Winter Wheat, \$37,266,752; Spring Wheat, \$2,663,882; Corn, \$97,483,052; Oats, \$12,059,162,—a total value for these crops of \$149,472,853. For the same crops of 1878 a similar estimate placed their value at \$95,693,282. There was also produced in the state, in 1879, 4,238,824 bnshels of Rye valued at \$1,991,404, and 578,911 bnshels of barley, valued at \$265,951.

Showing the Valuations of Property for purposes of Taxation in the State of Illinois from 1839 to 1879, inclusive; also the Public Debt of the State for the same time.

Note.—Up to 1850 only the aggregate valuations in the several counties were reported to the State officers, and from 1852 to 1857, inclusive, a few counties returned only the aggregates; hence the details of Real Estate and Personal Property valuations are not complete for those years. In 1867 and 1868 the details of valuation are not entirely correct, owing to changes by the operation of the equalization law; since 1868 the valuations are as equalized. The total valuations in each of the several years are entirely correct and official.

The valuations for 1873 as equalized are largely in excess of any previous year. In 1874 some changes were made in the manner of equalizing the assessments, resulting in reducing all the valuations, but especially that of Railroad Property.

The State Debt, as noted, represents it as it stood on the 1st of January in each of the several years to 1869. In 1869 and 1870, as it stood December 1. In 1871, as it stood December 31. Since 1872, as it stood December 1.

Of the Debt as it stood at the close of 1879 there had been called in, to be paid early in January, 1880, the sum of \$270,300. The remainder of the debt is subject to call, and is expected to be paid early in 1881, or before.

Showing the Valuations of Real Estate and Personal Property in the City of Chicago for purposes of taxation. Also the Amount of Taxes levied, and the Public Debt of the City in each year since 1849.

Note: —From 1851 to 1862, inclusive, a Lamp Tax of half a mill to two mills was levied on certain portions of the city, and is included in the above Total Tax. The city debt, as noted, represents it as it stood on February 10 in 1852 to 1854, inclusive; on February 1 in 1855 to 1874, inclusive; and on December 31 in 1875, 1876, 1877 and 1878. Valuations for 1875 to 1879 inclusive are by the County assessment, as equalized by the State Board of Equalization. Of the whole bonded debt of the city \$4.248,000 are water bonds. The income from water rents now pays the operating expenses, interest on the indebtedness on account of water, and leaves a surplus for extension of the water mains and for retirement or redemption of the bonds.

CANAL STATISTICS—(OFFICIAL).

1848 to 1879 inclusive.

The following Statement shows the Expenses of Repairs, Renewals, etc., also the Amount of Tolls collected, together with the dates of the Opening and Closing of the Illinois and Michigan Canal.

SUMMER PACKING.

The Cincinnati *Price Current* reports the aggregate number of Hogs packed in the west between March 1 and November 1, from 1871 to 1878, as follows: In 1871, 250,000; in 1872, 505,500; in 1873, 1,062,916; in 1874, 1,200,444; in 1875, 1,262,343; in 1876, 2,307,866; in 1877, 2,543,120; in 1878, 3,378,044. Previous to 1873 this packing was mainly confined to March and October. Since then it has been conducted to a greater or less extent, by the aid of ice, throughout the summer months. Of this class of packing there were packed in Chicago in 1873, 306,536 Hogs; in 1874, 446,368 Hogs; in 1875, 728,781 Hogs; in 1876, 1,315,402 Hogs; in 1877, 1,508,026 Hogs; in 1878, 2,017,841 Hogs; and in 1879, about 2,100,000 Hogs.

REGULATIONS GOVERNING THE INSPECTION OF FLOUR

IN CHICAGO,

ADOPTED BY THE BOARD OF TRADE.

In force December 31, 1879.

GRADES.

REGULATION 1. The Board of Directors shall establish and fix the standards for two grades of "Super" Flour and two grades of "Extra" Flour, to be designated respectively "Fine," "Superfine," "Extra" and "Double Extra." Samples of these standards shall be furnished to the Flour Inspectors for their government in inspecting, and also to the Secretary of the Association, to be kept by him for comparison.

INSPECTION COMMITTEE.

Reg. 2. The Board of Directors shall appoint a standing committee on Flour Inspection, to consist of five members, at least three of whom shall be dealers in Flour. Said committee shall have and exercise a general control of the Inspection of Flour.

FLOUR TO INSPECT AS SOUND.

REG. 3. Flour classed as sound shall be strictly sound, free from any and every defect or fault causing either smell or taste.

FLOUR TO INSPECT AS UNSOUND.

Reg. 4. Flour (below the grade of "Superfine") made from Wheat containing noxious seeds or screenings, or having an unpleasant smell or taste, which in the judgment of the Inspector would largely disappear in the baking, shall be classed as "off." All Flour not sound, whether the unsoundness be derived from the condition of the grain from which it was manufactured, or has originated in the Flour, shall be classed as unsound.

INSPECTION.

Reg. 5. The Inspectors of Flour shall inspect "Extra" by grade only. "Fine," "Superfine," or "Double Extra" may be inspected by grade or by sample, as requested by the party ordering the inspection. Samples of all Flour inspected shall be furnished by the Inspectors to the party ordering the inspection. In all cases of inspection by grade the Flour to pass "Extra" must be equal to the standard of "Extra" in color; if the Flour is equal to the standard in body and strength, but inferior in color, it shall not be inspected "Extra"; if the Flour is equal in color, but lacking in body and strength and shows a large amount of middlings or seconds, it shall not be inspected as "Extra." In order that Flour may pass as "Extra" it must possess equal color with the standard, and must also show a fair amount of body and strength. In case of doubt on the part of the Inspector as to whether Flour is fully up to the standards established, if the Flour is substantially equal to the standard in color, and has a fair amount of body and strength, it shall receive the benefit of the doubt and be passed as of the higher grade.

BRANDING.

Reg. 6. The Inspector shall brand all Flour, except that below the standard of "Fine," that has been inspected, as "Sound," and "Full Weight," and none other. For branding, stencils shall be used which shall state the month in which the Flour was inspected, and on "Extra" shall also state the grade of the Flour.

CERTIFICATES OF INSPECTION.

Reg. 7. Certificates of Inspection shall be issued only as "Extra" on all Flour so graded. Certificates may be issued by grade or by sample, as desired by the party ordering the inspection, on any Flour inspecting "Double Extra," "Superfine," "Fine," or below "Fine"; but when issued by grade the Flour shall be branded as of the grade. No certificate shall be issued for part of any lot of Flour inspected without the consent of both the buyer and seller. When Flour is unsound the Inspectors shall state in their certificates the character of the unsoundness, as musty, hard sour, soft sour or slightly unsound (the latter qualification of the unsoundness being intended to indicate that the Flour will probably work sound for immediate use, and is but slightly depreciated in value), the number of packages of each description, and also, when practicable, the number of packages that may be so stained or out of condition as to depreciate the market value of the Flour. In case the Flour has been overhauled and cleaned on account of having been wet, and the Inspectors shall deem such overhauling in any way damaging to the market value of the Flour, they shall note on their certificates "wet and cleaned." If Flour is in flathooped barrels the Inspectors shall so note in their certificates.

REINSPECTION.

Reg. 8. When on reinspection Flour is found to be sour, it shall be reweighed, but no charge shall be made by the Inspectors for weighing if it proves to be short in weight.

WEIGHTS.

Reg. 9. A barrel of Flour shall be deemed to weigh one hundred and ninety-six (196) pounds net, and no allowance shall be made for any overweight. In case of short weights the buyer shall be allowed for the shortage at the rate he pays and one-half a cent per pound on the same for freight, and in addition five (5) cents per barrel for the expense of refilling. Buyers of sacked Flour shall be allowed reclamation for short weights only. The Inspectors shall satisfy themselves in regard to weights, and in case they deem it necessary to strip some of the Flour they shall strip five (5) barrels from each lot, and shall be entitled to fifteen (15) cents for each barrel so stripped, if it proves to be short in weight, the charge for stripping to be paid by the seller.

INSPECTORS' FEES.

Reg. 10. The fee for inspecting and branding Flour shall be two (2) cents per barrel, and for Flour in sacks one (1) cent per sack, it being understood that a sack of Flour weighs ninety-eight (98) pounds, it being intended that the fees shall be the same per barrel whether the Flour is in sacks or barrels.

IRREGULAR FLOUR.

REG. 11. When Flour inspects "Double Extra," "Superfine," "Fine," or below "Fine," or when the Inspectors are working to a sample, in case the Flour does not run

uniform, the Inspectors shall note that fact on their certificates, together with the number of packages of each quality, samples of which shall be submitted to the party ordering the inspection, for examination.

FURTHER DUTIES OF INSPECTORS.

Reg. 12. It shall be the duty of the Inspectors to furnish the standard samples of Flour to which they are working to the Committee on Flour Inspection, for the use of the Secretary of the Association, monthly, or oftener if directed, and also to keep in their office, for the accommodation of the trade, the official standard samples of "Double Extra," "Extra," "Superfine" and "Fine" Flour in current use in New York, Boston, Philadelphia, Baltimore, St. Louis and Montreal, said samples to be furnished by the Secretary of the Association. It shall be the further duty of the Inspector to ascertain the stock of Flour in Chicago on the first day of each month, and to report the same to the Secretary of the Association, to be by him posted upon the bulletin of the Exchange room. In taking the account of stock there shall be included only the amount in the several freight depots, the public warehouses and the place of storage by receivers, and in the city mills. The Inspectors shall also furnish to the Secretary of the Association, monthly, a statement of the number of barrels and the number of sacks of Flour inspected by them during the preceding month, designating the amount inspected of each grade, and the amount inspected by sample.

LIABILITIES OF INSPECTORS.

Reg. 13. The Inspectors shall only be liable for damages for any discrepancy between the Flour for which a certificate is issued and the sample they retain of the Flour so inspected, unless the buyer furnishes them a sample to inspect by, or the standard sample is used. In all claims for errors of inspection by grade the final test shall be by the standard samples in the care of the Secretary of the Association.

The Committee on Flour Inspection recommend to shippers of flour in sacks, to be inspected in this market, that in closing the sack the mouth edge of the sack be turned in without rolling, and sewed with a single seam. They further recommend that in loading cars the sacks be either placed on end with the mouth up (leaving the space between the doors clear), or tiered on both sides of the car with the mouth toward a passage left between the tiers. Unless this last recommendation be complied with the Inspector may be compelled to charge for the labor necessary to put the Flour in proper position for inspecting.

Committee on Flour Inspection for 1880.—Thomas Heermans, Chairman, S. A. Scribner, Robert Warren, E. Nelson Blake, Edmund Norton.

Inspector of Flour.—R. W. RATHBORNE.

RULES GOVERNING THE INSPECTION OF GRAIN,

IN THE CITY OF CHICAGO,

In force December 31, 1879.

The following are the rules adopted by the Board of Railroad and Warehouse Commissioners, establishing a standard of grades for the inspection of grain, under the authority of the State of Illinois:

WINTER WHEAT.

- No. 1 WHITE WINTER WHEAT shall be pure White Winter Wheat, sound, plump, and well cleaned.
- No. 2 WHITE WINTER WHEAT shall be White Winter Wheat, sound and reasonably pure and reasonably clean.
- No. 1 Amber Wheat shall be pure Amber Winter Wheat, sound, plump and well cleaned.
- No. 1 Long Red Winter Wheat shall be pure Red Winter Wheat, of the long berried varieties; sound, plump and well cleaned.
- No. 2 Long Red Winter Wheat shall be of the same varieties as No. 1, sound and reasonably clean.
- No. 1 Red Winter Wheat shall be pure Red Winter Wheat, of both light and dark colors of the shorter berried varieties; sound, plump and well cleaned.
- No. 2 RED WINTER WHEAT shall be Red Winter Wheat, of both light and dark colors; sound and reasonably clean.
- No. 2 Winter Wheat shall include all mixtures of the different varieties of Winter Wheat, and shall be sound, reasonably clean, and of good milling quality.
- No. 3 Winter Wheat shall include Winter Wheat not clean and plump enough for No. 2, but weighing not less than 54 pounds to the measured bushel.

REJECTED WINTER WHEAT shall include Winter Wheat damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

SPRING WHEAT.

- No. 1 Hard Spring Wheat shall be sound, plump and well cleaned.
- No. 2 Hard Spring Wheat shall be sound, reasonably clean, and of good milling quality.
 - No. 1 Spring Wheat shall be sound, plump and well cleaned.
 - No. 2 Spring Wheat shall be sound, reasonably clean, and of good milling quality.
- No. 3 Spring Wheat shall include all inferior, shrunken or dirty Spring Wheat, weighing not less than 53 pounds to the measured bushel.

REJECTED Spring Wheat shall include Spring Wheat damp, musty, grown, badly bleached, or for any other cause which renders it unfit for No. 3.

In case of mixture of Spring and Winter Wheat, it shall be called Mixed Wheat, and graded according to the quality thereof.

BLACK SEA AND FLINTY PFIFE WHEAT shall in no case be inspected higher than. No 2 and Rice Wheat no higher than Rejected.

CORN.

No. 1 Yellow Corn shall be yellow, sound, dry, plump and well cleaned.

No. 1 WHITE CORN shall be white, sound, dry, plump and well cleaned.

No. 1 Corn shall be sound, dry, plump and well cleaned, white and yellow unmixed with red.

HIGH MIXED CORN shall be three-quarters yellow and equal to No. 2 in condition and quality.

No. 2 Corn shall be dry, reasonably clean, but not plump enough for No. 1.

No. 2 KILN DRIED CORN shall be sound, plump and well cleaned, White or Yellow. All kiln-dried corn not good enough for No. 2 kiln-dried shall be graded as Rejected kiln-dried Corn.

NEW HIGH MIXED CORN shall be three-fourths yellow, of any age, reasonably dry, and reasonably clean, but not sufficiently dry for High Mixed or No. 2.

NEW MIXED CORN may be less than three-fourths yellow, of any age, and shall be reasonably dry and reasonably clean, but not sufficiently dry for No. 2.

REJECTED — All damp, dirty or otherwise badly damaged Corn shall be graded as Rejected.

OATS.

No. 1 Oats shall be white, sound, clean, and reasonably free from other grain.

No. 2 White Oats shall be three-quarters white and equal to No. 2 in all other respects.

No. 2 Oats shall be sound, reasonably clean, and reasonably free from other grain.

REJECTED — All Oats, damp, unsound, dirty or for any other cause unfit for No. 2, shall be graded as Rejected.

RYE.

No. 1 RyE shall be sound, plump and well cleaned.

No. 2 RyE shall be sound, reasonably clean, and reasonably free from other grain.

REJECTED — All Rye, damp, musty, dirty, or from any cause unfit for No. 2, shall be graded as Rejected.

BARLEY.

No. 1 Barley shall be plump, bright, sound, clean, and free from other grain.

No. 2 Barley shall be sound, bright, not plump enough for No. 1, reasonably clean, and reasonably free from other grain.

Extra No. 3 Barley shall include slightly shrunken and otherwise slightly damaged Barley not good enough for No. 2.

No. 3 Barley shall include shrunken, and otherwise damaged Barley, weighing not less than 41 pounds to the measured bushel.

FEED BARLEY shall include all Barley which is damp, or from any cause badly damaged or unfit for malting purposes, or which is largely mixed with other grain.

The word "new" shall be inserted in each certificate of inspection of a newly-harvested crop of Oats until the 15th day of August; of Rye, until the 1st day of September; of Wheat until the 1st day of November; and of Barley until the 1st day of May of each year. This change shall be construed as establishing a new grade for the time specified, to conform in every particular to the existing grades of grain, excepting the distinctions of "new" and "old."

All grain that is warm or that is in a heating condition, or is otherwise unfit for ware-housing, shall not be graded.

All Inspectors shall make their reasons for grading grain, when necessary, fully known by notations on their books. The weight alone shall not determine the grade.

Each Inspector is required to ascertain the weight per measured bushel of each lot of wheat inspected by him, and note the same in his book.

Any person who shall assume to act as an Inspector of Grain, who has not first been so appointed and sworn, shall be held to be an impostor, and shall be punished by a fine of not less than \$50 nor more than \$100 for each and every attempt to so inspect grain, to be recovered before a justice of the peace.

Any duly authorized Inspector of Grain, who shall be guilty of neglect of duty, or who shall knowingly or carelessly inspect or grade any grain improperly, or who shall accept any money or other consideration, directly or indirectly, for any neglect of duty or the improper performance of any duty as Inspector of Grain, and any person who shall improperly influence any Inspector of Grain in the performance of his duties as such Inspector, shall be deemed guilty of a misdemeanor, and, on conviction, shall be fined in a sum of not less than \$100 nor more than \$1,000, in the discretion of the court, or shall be imprisoned in the county jail not less than three nor more than twelve months, or both, in the discretion of the court.

All Assistant Inspectors, when upon duty, shall wear a badge furnished by the Chief Inspector, plainly designating the position of each in the department.

The said Chief Inspector, and all persons inspecting grain under his direction, shall in no case make the grade of grain above that of the poorest quality found in any lot of grain when it has evidently been mixed or doctored for the purpose of deception.

All persons employed in the inspection of grain shall report all attempts to defraud the system of grain inspection as established by law. They shall also report to the Chief Inspector, in writing, all instances where warehousemen deliver, or attempt to deliver grain of a lower grade than that called for by the warehouse receipt. They shall also report all attempts of receivers or shippers of grain to instruct or in any way influence the action or opinion of the Inspector, and the Chief Inspector shall report all such cases to the Commissioners.

Railroad and Warehouse Commissioners of Illinois.—Wm. M. Smith, J. H. Oberly, George M. Bogue.

Chief Inspector of Grain.—John P. Reynolds.

Committee of Appeals on Grain Inspections.—George Field, John Walker, C. A. Phelps.

FURTHER DETAILS OF DIRECT EXPORTS.

Included in the Exports noted on the previous page are shipments by the Merchants' Despatch Transportation Company amounting to about 457,000 tons, forwarded a portion each via Michigan Central and Lake Shore & Michigan Southern Railways and by Lake. These shipments were divided between New York and Boston. Shipments by the Pittsburgh, Fort Wayne & Chicago Railway went, 94,083 tons via Philadelphia, and 80,416 tons via New York. The Hoosac Tunnel Line shipped by Michigan Central and Lake Shore & Michigan Southern Railways and by Lake about 42,000 tons, the whole being exported via Boston. The National Despatch Line, via Grand Trunk Railway of Canada, forwarded about 24,500 tons, and considerable shipments were also made from Chicago by the Empire, Canada Southern, Erie & Pacific Despatch, and Erie & North Shore Fast Freight Lines, and by the Union Steamboat Company. The Agency of the American and Blue Star Lines to Liverpool and Red Star Line to Antwerp, all from Philadelphia, billed from Chicago about 88.000 tons, shipped hence by Pittsburgh, Fort Wayne & Chicago and Pittsburgh, Cincinnati & St. Louis Railways and by Lake. The Anchor (Ocean Steamship) Line billed about 49,000 tons, and the Inman Line about 10,000 tons. All these shipments are included in those embraced on the previous page. A large portion of the Flour and Oatmeal exported during the past year has been in sacks, generally of 140 lbs. each: these, in the statement, have been reduced to their equivalent in barrels.

FREIGHT RATES FROM CHICAGO TO EUROPE

On through Bills of Lading during 1879.

(Rail to the Seaboard and thence by Steamer.)

The following rates for Freight from Chicago to the points named have been compiled from the reports of actual engagements made by the several agencies engaged in the export of commodities, and present, it is believed, a substantially correct exhibit of the current rates of the year, although it does not include nominal rates at times when no business was offering. The rates named include all charges intermediate between points of shipment and destination.

ALL-RAIL THROUGH BUSINESS.

The following Statement shows the amount of Flour and Grain received at Chicago during 1879 by western railways and delivered to connecting lines without passing through a Chicago elevator. These amounts are all included in the general statements of receipts and shipments published herewith, except shipments originating in Milwaukee; those are deducted from the receipts and shipments of Chicago as shown by the general statements, but are included in this.

Received by Chicago & Northwestern Railway.

Months.	Flour, barrels.	Wheat, bushels.	Corn, bushels.	Oats, bushels.	Rye, bushels.	Barley, bushels.	Total No of Cars.

IMPORTATIONS OF TEA AND COFFEE.

(DUTY FREE.)

The following Statement, kindly furnished for this Report by Messrs. Moseback & Humphrey, commission merchants and brokers in tea and coffee, No. 42 Wabash Avenue, shows the amount of direct importations of Tea and Coffee by Chicago merchants during the past five years.

The Statement embraces only such shipments as were consigned direct to Chicago from foreign ports, and does not include consignments to Chicago merchants from points in this country or in Canada, nor the importations of Chicago merchants disposed of before reaching Chicago. Messrs. M. & H. state the invoice value of these importations in 1879 to have been about \$4,500,000.

Note.—The question of quality, as well as weight, so largely enters into the value of Live Stock that it is difficult to arrive at satisfactory quotations based on either quality or weight. In the above quotations reference has been had to good classes of stock, not including the extremes of either very common or extra choice.

PRICES FOR HIGHWINES.

The following shows the current prices or assumed value of Highwines for each week during 1879. In reality, very little, if any, Highwines, as such, are now sold in the Chicago market. Prices of the various classes of Distilled Spirits, including Alcohol, are, however, made upon the basis of a valuation for Highwines, and during the year quotations for all forms of Spirits not rectified have been based upon a valuation for Highwines as indicated below.

Notr.—Bulk Meats were charged 5 cents per 100 lbs. over current rates for Boxed Meats throughout the year to the seaboard cities. Pork, in barrels, was above. Timothy Seed was charged 10 cents per 100 lbs. over Fourth Class rates to the seaboard, and Clover was charged, as Third Class, 70 cents per 100 lbs. to New York. Previous to June 9, when the control of the "Joint Executive Committee" of the Railway lines was fully established, the above rates were more or less varied, Grain being taken to New York in May at as low as 10 cents per 100 lbs. Since the above date Tariff rates are believed to have been more closely taken at estimated weight of 320 lbs. per barrel at Fourth Class rates. By the Tariffs of November 10 Flax and Cotton Seeds only were taken at the rates quoted adhered to than for any similar length of time for many years.

LAKE (STEAM) AND RAIL FREIGHTS
